

Q3 EPS: Robust Execution for Muscarinic - Phase II Schizophrenia Data in H2:26

In H2:26, we think oral ML-007 (novel M1/M4 muscarinic) has a 30-40% PoS to generate superior Phase II schizophrenia data (+100% stock move), helping de-risk its second program in Alzheimer's psychosis (ADP) which has Phase II data in H2:27 (another +100% move). BMJ Cobenfy's (M1/M4) pushout of Phase III ADP data to YE:26 allows '007 to first prove if it is superior in SCZ (cleaner setup for MPLT). **BMJ's delay** does not impact MPLT's SCZ study (no site overlap).

Big picture: In 2026-27, MPLT will have 3 potentially-pivotal Phase II readouts. ML-007C-MA (oral M1/M4 agonist) has schizophrenia (**SCZ**) data in H2:26 (**ZEPHYR**) and Alzheimer's psychosis (**ADP**) data in H2:27 (**VISTA**), while ML-004 (oral 5-HT1B/1D) has autism spectrum disorder (**ASD**) data in H2:26 (**IRIS**). \$1B+ peak sales per indication x low 2-3x multiple = \$2-3B valuation, meaning 3 shots on goal. Also, we know Big Pharma is interested in muscarinics, as evidenced by the \$14B+ deal between BMJ/KRTX (Cobenfy) and \$9B for ABBV/CERE (emraclidine).

The stock setup seems favorable with a competitor overhang somewhat removed. Already approved in SCZ, BMJ Cobenfy was expected to share Phase III ADP data in Q4:25 (ADEPT-2) - ahead of MPLT's Phase II SCZ/ADP datasets in 2026-27. The Street was uncertain about the likelihood of BMJ's ADP program succeeding, thereby creating an unfavorable setup for MPLT. However, with BMJ now **pushing back** the ADP readout to YE:26 (ADEPT-2), the Street could potentially first get a glimpse of '007's pot'l superiority in SCZ (whose data has readthrough to '007 in ADP), before having to navigate through BMJ's own ADP readouts. BMJ's decision to upsize could also suggest a modest (+) efficacy benefit as well. In any case, we know ZEPHYR has **no site overlap** with ADEPT-2, since SCZ is inpatient (led by psychiatrists) while ADP is outpatient (led by Alzheimer's docs/neurologists). Although VISTA and ADEPT-2 sites may overlap, MPLT has an in-house monitoring team to ensure its studies produce the highest quality data.

In H2:26, ML-007's pbo-controlled Phase II ZEPHYR trial (N=300) could produce superior SCZ data. Mgmt may refine its data timing guidance in early 2026. **(1)** ML-007C-MA is a fixed-dose combo of ML-007 (strong M1/M4 muscarinic agonist) + fesoterodine (anticholinergic). The former drives efficacy, while the latter blunts any pro-cholinergic side effects caused by M1/M4 agonism (e.g. nausea, vomiting). **(2)** KRTX's Cobenfy (approved in Sep 2024) is a novel MOA with favorable efficacy/safety in SCZ (vs antipsychotics). Its sales trajectory (\$172M run rate) looks stronger than recent antipsychotic SCZ launches (e.g. Latuda, Caplyta). **(3)** We think ML-007C-MA could have superior attributes to Cobenfy, such as competitive efficacy (and pot'l to benefit all SCZ domains), cleaner safety/tolerability (less vomiting, GI/urinary AEs) and fewer discontinuations. ML-007's dosing is 1x/day in SCZ (vs BMJ 2x/day) and 2x/day in ADP (vs BMJ 3x/day). MPLT could have stronger IP protection as well.

Site Selection	+	Enrollment	+	Study Conduct
• Limited number of sites (25) • Single geography - US only • Extensive vetting of sites using: – Quality metrics for raters in recent acute schizophrenia studies – Recent enrollment in positive acute schizophrenia studies – 1:1 interviews with PIs – Input from external consultants • Individual site enrollment gated based on data quality from initial participants		• Limited number of participants (N=300) • Single study with conservative enrollment metrics to avoid pushing enrollment too fast • Participants required to complete a 3-step robust eligibility review process • Duplicate patient exclusion process • Target population must have moderate-to-severe symptoms at screening and baseline – Excludes participants with >20% improvement from screening to baseline		• In-sourced site relationship and data quality oversight responsibilities with in-house CRA / monitoring program • Robust quality monitoring during study conduct (independent central review, regular cadence of blinded data analytics) • Placebo response training to all participant facing site staff • Expectancy bias education to participants • CRO selected based on track record in recent schizophrenia studies

The Long View: Maplight Therapeutics

Investment Thesis / Where We Differ

Maplight Therapeutics (MPLT) is a clinical-stage biotech company focused on improving outcomes for patients with central nervous system (CNS) disorders, including schizophrenia. Their lead compound, ML-007C-MA (M1/M4) could offer a differentiated approach to treatment in both schizophrenia and Alzheimer's disease psychosis (ADP) by potentially improving dosing convenience, as well as safety/efficacy. Schizophrenia and ADP are both \$1B + opportunities in theory, making the risk/reward favorable at this valuation. MPLT also has a pipeline of other CNS/Neuro drugs for \$1B+ markets that are in Phase II trials (e.g., ML-004 in ASD) or could enter the clinic as early as 2026-27 to offer additional valuation support/upside.

Risk/Reward - 12 Month View

Base Case,
\$32, +73%

- Our base case is a SOTP analysis of ML-007C-MA in schizophrenia (\$1-2B peak sales and 30-40% PoS) and ADP (\$1-2B peak sales and 10-20% PoS), as well as \$500M-1B+ peak sales for ML-004 in ASD and 10-20% PoS.
- No credit is given for ML-021 in Parkinson's or ML-009 in hyperactivity/impulsivity
- For each program, we build the revenue and cash flow streams out to patent term expirations before probability-adjusting our DCF.
- Some credit given for cash

Upside Scenario,
\$52, +181%

- Our upside case includes a higher PoS for lead program ML-007C-MA in schizophrenia (55-65% PoS) and ADP (25-35% PoS), as well as ASD (15-25%) and earlier-stage pipeline programs (0-10%)
- No credit given for cash

Downside Scenario,
\$6, -68%

- Our downside case considers a lower PoS for lead program ML-007C-MA in schizophrenia (0-10%) and no credit for ADP. No credit for earlier-stage pipeline programs.
- Some credit given for cash

Sustainability Matters

Top Material Issue(s): 1) Product Quality and Safety: Lead drug ML-007C-MA could have a differentiated therapeutic profile than other epilepsy drugs, including no titration, a differing AE profile, and no food effect. MPLT should continue to demonstrate ML-007C-MA is safer and more convenient than its competitors, as this is a major point of differentiation. **2) Employee Engagement, Diversity and Inclusion:** Smaller biotech companies must ensure that they have sufficient talent to develop drugs (whereas large pharma/biotech may provide more stability). This is especially critical as companies look to supplement their commercial portfolio with newer drugs and or BD opportunities.

Company Target(s): None

Qs to Mgmt: 1) What gives you confidence in the safety profile of your schizophrenia and ADP drug vs competitors, including Cobenfy? **2)** What steps have you taken to prepare for 3+ Phase II studies in CNS/Neuro indications in the form of relevant employee and/or Board hires?

The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Jefferies Franchise Picks

Jefferies Franchise Picks include stock selections from among the best stock ideas from our equity analysts over a 12 month period. Stock selection is based on fundamental analysis and may take into account other factors such as analyst conviction, differentiated analysis, a favorable risk/reward ratio and investment themes that Jefferies analysts are recommending. Jefferies Franchise Picks will include only Buy rated stocks and the number can vary depending on analyst recommendations for inclusion. Stocks will be added as new opportunities arise and removed when the reason for inclusion changes, the stock has met its desired return, if it is no longer rated Buy and/or if it triggers a stop loss. Stocks having 120 day volatility in the bottom quartile of S&P stocks will continue to have a 15% stop loss, and the remainder will have a 20% stop. Franchise Picks are not intended to represent a recommended portfolio of stocks and is not sector based, but we may note where we believe a Pick falls within an investment style such as growth or value.
