Eagerly waiting for Phase 2 data for ML-007C-MA in schizophrenia in 3Q26; reiterate BUY, \$35PT

Stock presents opportunity into Phase 2 data in 3Q26

Earlier today (3/26), MPLT reported its 4Q25 results and filed its first 10-K as a public company. Recall lead-candidate ML-007C-MA is in the ZEPHYR Phase 2 trial for schizophrenia. The product is a novel combination of a centrally acting M1/M4 muscarinic agonist with a peripheral antagonist to block ex-CNS activity/side effects. This means the product utilizes a mechanism that is similar to Bristol's Cobenfy (xanomeline/trospium) that is already approved for schizophrenia. In addition, ML-007C-MA could be best-in-class given it could be differentiated on efficacy/safety (better matching on pharmacokinetic profile for the combo) and a more convenient dosing profile (no fasting requirement, potential for 1x/day dosing, etc.). The key update for us was that MPLT expects to reach target enrollment (n = 300 patients) for ZEPHYR in Apr-26, and is on track to report results in 3Q26, into which we see opportunity here. As [we noted in our recent initiation of coverage](#), we are BUYERS of MPLT for three key reasons: 1) somewhat de-risked mechanism presents opportunity into ZEPHYR data in 3Q26, and we view MPLT as undervalued on the schizophrenia opportunity alone; 2) Alzheimer's disease psychosis (ADP) is an even-bigger opportunity with no specific products approved and VISTA Phase 2 data are on track for 2H27; and 3) other pipeline candidates exist, e.g., ML-004 is in the IRIS Phase 2 trial for autism spectrum disorder (ASD) with data in 3Q26, on which we see limited downside with potential for a positive surprise. Reiterate BUY.

Adjusting model post-4Q25 results; DCF-based price target remains at \$35

We are adjusting our model post-4Q25 results, which contained some IPO-related expenses. The company continues to expect a cash runway through 2027E, which our model continues to be in line with. We are not changing our key model assumptions, which are as follows. We assume launches for ML-007C-MA in 2030E/2031E with probabilities of approval of 40%/30% for schizophrenia/ADP, at a \$16k net price at launch. Our peak patient share/sales in 2036E (model horizon) are 3.5%/ \$1.1bn for schizophrenia and 3.75%/2.6bn for ADP. We give no specific credit for other programs or ex-US revenues. Our DCF-based price target remains at \$35.

What's the chatter after our initiation?

Investors are looking forward to the ZEPHYR Phase 2 data in 3Q26, and as we expected, are focused on what a "good" placebo-adjusted score on the Positive and Negative Syndrome Scale (PANSS) at week-5 could be vs. Cobenfy's results, i.e., -9.6/-8.4 in the Emergent 2/Emergent 3 Phase 3 trials, and -11.6 in a Phase 2 trial (see [pg. 26 of our initiation report](#) for additional details). In this context, we note a couple of key points: 1) ZEPHYR, which is a registrational Phase 2 trial, is more like a Phase 3 with n = 300 patients vs. a Phase 2 trial that is typically smaller; and 2) doctors/experts we spoke with are more focused on a product's efficacy, side effect profile and dosing convenience, which are arguably greater determinants of potential real-world success vs. placebo-adjusted PANSS scores. As such, the doctors' relative lack of focus on the PANSS score is as unsurprising to us as the investor focus is on this metric.

Investment Recommendation

Date and time of first dissemination: March 26, 2026, 17:06 ET

Date and time of production: March 26, 2026, 17:06 ET

Target Price / Valuation Methodology:

MapLight Therapeutics - MPLT

We value MPLT using a discounted cash flow (DCF) methodology. For our DCF, we: 1) model sales for a defined period from 2026E to 2036E; 2) include contributions from ML-007C-MA for schizophrenia and Alzheimer's disease psychosis (ADP) at probabilities of approval of 40% and 30%, respectively; 3) give no specific credit for other pipeline programs, e.g., ML-004 in Phase 2 for autism spectrum disorder/ASD, and preclinical candidates ML-021 (Parkinson's disease/PD) and ML-009 (hyperactivity/impulsivity); 4) probability-weight R&D and SG&A expenses in 2027E and beyond (as Phase 2 top-line data readouts are coming in 2026E+). We then compute terminal value based on a 0% terminal growth rate. We discount after-tax profits back to the end of 2026E at a discount rate of 15%, which we believe is a reasonable assumption for a clinical-stage biopharma company's weighted average cost of capital (WACC). This leads to our 12-month DCF-based price target of \$35 for MPLT.

Risks to achieving Target Price / Valuation:

MapLight Therapeutics - MPLT

Risks to our thesis: pipeline is focused on difficult-to-treat neuropsychiatry conditions such as schizophrenia and Alzheimer's disease psychosis (ADP), and neurodegenerative conditions; trial failures due to lack of efficacy/safety; lack of FDA acceptance of filings or approval; dilutive capital raising activity; and/or eventually unsuccessful launches or commercial performance due to greater than expected competition, pricing pressure or lack of sufficient resources to compete.

Research Distribution Policy

Canaccord Genuity research is posted on the Canaccord Genuity Research Portal and will be available simultaneously for access by all of Canaccord Genuity's customers who are entitled to receive the firm's research. In addition research may be distributed by the firm's sales and trading personnel via email, instant message or other electronic means. Customers entitled to receive research may also receive it via third party vendors. Until such time as research is made available to Canaccord Genuity's customers as described above, Authoring Analysts will not discuss the contents of their research with Sales and Trading or Investment Banking employees without prior compliance consent.

For further information about the proprietary model(s) associated with the covered issuer(s) in this research report, clients should contact their local sales representative.

Short-Term Trade Ideas

Research Analysts may, from time to time, discuss "short-term trade ideas" in research reports. A short-term trade idea offers a near-term view on how a security may trade, based on market and trading events or catalysts, and the resulting trading opportunity that may be available. Any such trading strategies are distinct from and do not affect the analysts' fundamental equity rating for such stocks. A short-term trade idea may differ from the price targets and recommendations in our published research reports that reflect the research analyst's views of the longer-term (i.e. one-year or greater) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. It is possible, for example, that a subject company's common equity that is considered a long-term 'Hold' or 'Sell' might present a short-term buying opportunity as a result of temporary selling pressure in the market or for other reasons described in the research report; conversely, a subject company's stock rated a long-term 'Buy' or 'Speculative Buy' could be considered susceptible to a downward price correction, or other factors may exist that lead the research analyst to suggest a sale over the short-term. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm does not intend, and does not undertake any obligation, to maintain or update short-term trade ideas. Short-term trade ideas are not suitable for all investors and are not tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your salesperson for more information regarding Canaccord Genuity's research.
