SMID Cap Earnings Round Up: EIKN, MPLT

We provide key takeaways from 4Q25/FY25 earnings update across our SMID Cap coverage.

Eikon Therapeutics (EIKN): Enrollment in the EIK1001 Phase 2 TeLuRide-005 trial in 1L treatment of Stage 4 NSCLC in combination with pembrolizumab and histology-appropriate chemo has been completed. The comprehensive dataset remains on track for 2H26, along with the first interim analysis in melanoma. The EIK1003 Cohort 1B/1C data readouts are expected in 2H26 and the completion of the EIK1004 Phase 1/2 dose escalation is on track for 2H26. In addition, the company anticipates initiating the EIK1003 Phase 1/2 Cohort 1D in combination with platinum and paclitaxel therapy in breast and ovarian cancer treatment in 2H26. We had a chance to speak with mgmt. who indicated that all programs are progressing at the high end of expectations, and that '1004 is enrolling well. The company's rationale for initiating Cohort 1D is to test whether '1003 can be safely combined with platinum-based 1L ovarian regimens (building on prior paclitaxel tolerability) to enable earlier, potentially paradigm shifting use of a more selective PARP1 inhibitor, consistent with the original hypothesis that greater PARP1 selectivity could improve the therapeutic index. For EIK1005, an abstract on the asset's preclinical characterization was accepted for presentation at the 2026 AACR meeting and the Phase 1/2 trial is now underway in patients with malignant disease. The company ended the year with ~\$336mn in cash/equivalents which, along with ~\$381.2mn raised in gross proceeds from the February 2026 IPO, is expected to fund operations into 2H27. **Model updates:** We updated our model with the 10-K filing. The net result is that our 2026/2027/2028 GAAP EPS goes to -\$6.87/- \$6.77/- \$6.21 from - \$6.06/- \$6.03/- \$5.55.

MapLight Therapeutics (MPLT): The company announced a surprise next generation M1/M4 agonist (ML 055) whose improved potency can enable once daily oral dosing and LAI dosing (like other monthly injectable antipsychotics). ML007-C-MA topline ZEPHYR results are on track for 3Q26 (alongside signal-seeking topline for ML004 in autism, expected same quarter). We see the ML007 topline as a meaningful value inflection for shares (until Phase 2 VISTA in 2H27) The topline could also help inform expectations on ML007's differentiation from competitive readouts from BMJ in AD psychosis expected later this year. MapLight ended FY25 with \$453M in cash and runway through FY27 and past major catalysts which we see as major value inflection points (ZEPHYR in 3Q and Phase 2 VISTA in ADP in 2H27). Indeed, Phase 2 ZEPHYR trial in schizophrenia remains on track to complete enrollment (~300 patients) in April 2026, positioning topline data for 3Q26 (potentially ahead of COBENFY ADEPT studies in AD psychosis which are expected to readout by year end (BMJ is covered by Terence Flynn). Also in 3Q, Phase 2 IRIS study of ML 004 in autism spectrum disorder has completed enrollment (~160 patients), with topline data also on track for 3Q26

(although we note the study is designed as signal-seeking trial, and we expect limited stock impact relative to ZEPHYR). On pipeline expansion, management highlighted progress with ML 055, a next generation M1/M4 agonist showing improved potency and potential for once daily or LAI dosing, with candidate nomination expected in 2026. **Model updates:** We updated our model for quarterly BS and CF projections and for the 4Q result. The net result is that our 2026/2027/2028 GAAP EPS goes to -\$4.02/-3.69/\$-4.61 from -\$3.75/-3.57/-4.66.

OVERWEIGHT THESIS

Eikon Therapeutics offers an attractive oncology risk-reward anchored by EIK1001, a systemically delivered TLR7/8 dual agonist that has shown ~60% ORR in first-line NSCLC with pembrolizumab and chemotherapy, a favorable safety profile, and multiple registrational readouts in 2H26 across NSCLC and melanoma. Incremental upside comes from PARP1-selective inhibitors EIK1003/1004, which show early efficacy with reduced hematologic toxicity, while longer-dated optionality is provided by the SMT discovery platform led by WRN inhibitor EIK1005.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of February 28, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research

may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
